Website Case Study Report

Case Study 1

Website URL

- https://github.com/

Purpose of the Website

GitHub is a web-based platform used to store, manage, and share source code. It helps developers collaborate on projects, track changes using version control, and contribute to open-source software.

Domain

- Software Development
- Version Control
- Collaboration Platform

Inventor / Founder of the Website

- Founded by Tom Preston-Werner, Chris Wanstrath, PJ Hyett, and Scott Chacon

Technology Used for the Website

- HTML, CSS, JavaScript
- Git version control system
- Backend servers and databases
- Cloud hosting infrastructure

Website Summary

- Code hosting and collaboration platform
- Supports open-source and private projects
- Used by developers worldwide
- Essential tool for software development

Things Liked in the Website

- Easy code sharing and collaboration
- Strong version control features
- Free access for public repositories
- Large developer community

Things Disliked in the Website

- Difficult for beginners to understand
- Interface feels complex initially
- Requires Git knowledge

Overall Evaluation

- **Good**

Case Study 2

Website URL

- https://open.spotify.com/

Purpose of the Website

Spotify is a digital music streaming platform that allows users to listen to music, podcasts, and audio content online with personalized recommendations.

Domain

- Music Streaming
- Entertainment

Inventor / Founder of the Website

- Founded by Daniel Ek and Martin Lorentzon

Technology Used for the Website

- HTML, CSS, JavaScript
- Recommendation algorithms
- Cloud-based servers
- Audio streaming technology

Website Summary

- Online music and podcast streaming platform
- Personalized playlists and recommendations
- Global user base
- Available on web and mobile apps

Things Liked in the Website

- Huge music and podcast library
- Easy-to-use interface

- Personalized playlists like Discover Weekly
- Smooth streaming experience

Things Disliked in the Website

- Advertisements in free version
- Internet required for streaming
- Limited features without subscription

Overall Evaluation

- **Good**

Case Study 3

Website URL

- https://www.wikipedia.org/

Purpose of the Website

Wikipedia provides free and open access to information on a wide range of topics. It allows users to read, edit, and contribute articles collaboratively.

Domain

- Knowledge Sharing
- Education

Inventor / Founder of the Website

- Founded by Jimmy Wales and Larry Sanger

Technology Used for the Website

- HTML, CSS, JavaScript
- Wiki-based content management system
- Backend databases and servers

Website Summary

- Free online encyclopedia
- Covers academic and real-world topics
- Available in multiple languages
- Used by students and researchers globally

Things Liked in the Website

- Free and easily accessible information
- Large collection of articles
- Simple and clean layout

Things Disliked in the Website

- Information accuracy may vary
- Anyone can edit content
- Too many references can be confusing

Overall Evaluation

- **Good**

Case Study 4

Website URL

- https://www.belgianwaffles.com/

Purpose of the Website

The Belgian Waffles website is used to showcase and sell waffles and dessert items online. It provides menu details, prices, store locations, and online ordering options.

Domain

- Food & Beverage
- E-commerce

Inventor / Founder of the Website

- Developed by Belgian Waffles brand team

Technology Used for the Website

- HTML, CSS, JavaScript
- Online ordering system
- Backend servers and databases

Website Summary

- Food business promotional website
- Displays menu and product images
- Supports online ordering
- Helps customers find stores and offers

Things Liked in the Website

- Attractive images of food items
- Easy-to-navigate menu
- Online ordering feature

- Clean and appealing design

Things Disliked in the Website

- Delivery not available everywhere
- Heavy images slow page loading
- Limited information for some locations

Overall Evaluation

- **Good**

Case Study 5

Website URL

- https://www.irctc.co.in/

Purpose of the Website

IRCTC is an official online portal of Indian Railways used for booking train tickets, checking train schedules, PNR status, catering services, and tourism packages.

Domain

- Online Ticket Booking
- Government Services
- Travel & Transport

Inventor / Founder of the Website

- Developed and managed by Indian Railway Catering and Tourism Corporation (IRCTC)

Technology Used for the Website

- HTML, CSS, JavaScript
- Government backend systems
- Secure payment gateways
- Databases and servers

Website Summary

- Official railway ticket booking website
- Used by millions of users daily
- Provides ticket booking and travel-related services
- Critical national transport platform

Things Liked in the Website

- Official and reliable booking platform
- Multiple payment options
- PNR status and train schedule availability
- Useful for long-distance travel planning

Things Disliked in the Website

- Website slows down during peak hours
- Complex user interface
- Frequent session timeouts
- Booking failures at times

Overall Evaluation

- **Not Bad**

Case Study

Sr. No	Website URL	Purpose of website	Things liked in the website	Things disliked in the website	Overall evaluation of the website (Good/ Bad)
1.	https://github.com/	Code hosting and collaboration for developers	Easy code sharing, collaboration, free public repos	Hard for beginners, complex interface	Good
2.	https://open.spotify.com/	Online music and podcast streaming	Large library, easy use, personalized playlists.	Ads in free version, needs internet	Good
